

## DENMARK

Overall Index Score 80.3

Overall Index Grade A

Denmark's retirement income system comprises a public basic pension scheme, a means-tested supplementary pension benefit, a fully funded defined contribution scheme and mandatory occupational schemes.

The overall index value for the Danish system could be increased by:

- raising the level of household saving and reducing household debt
- introducing arrangements to protect the interests of both parties in a divorce
- increasing the labour force participation rate at older ages as life expectancies rise

The Danish index value increased slightly from 80.2 in 2018 to 80.3 in 2019 due to a small improvement in the sustainability sub-index.

### Comparison to other systems

### OVERALL INDEX HISTORICAL PERFORMANCE

2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019
